Powered by a responsive 2.0-liter turbocharged inline-four engine, it produces 296 horsepower and 295 lb-ft of torque, offering a balanced blend of efficiency and grit. While it maintains the Defender's classic, go-anywhere silhouette, the "S" trim is thoroughly modernized with a standard twin-speed transfer box and the Terrain Response system, allowing drivers to tackle snow, mud, or sand with confidence. Its 7,716 lb towing capacity ensures that whether you're heading to the campsite or the boat launch, nothing gets left behind. Inside, the Defender 110 S offers a cabin designed to withstand the elements without compromising on comfort. The interior is anchored by a massive 13.1-inch Pivi Pro touchscreen—the same high-end interface found in flagship models—paired with an Interactive Driver Display and a premium Meridian™ Sound System. Occupants are treated to 12-way heated front seats upholstered in high-durability Resist and Resolve materials, specifically engineered for longevity and easy cleaning after an outdoor adventure. With standard wireless charging and smartphone integration, the Defender keeps you connected even when you are miles off the grid. Safety and visibility are prioritized in the 2026 model, which comes standard with a 3D Surround Camera and a 360° Parking Aid to make maneuvering this substantial SUV effortless. The suite of driver assistance technology includes Adaptive Cruise Control, Blind Spot Assist, and Lane Keep Assist, providing a second set of eyes for long highway hauls. For the Canadian driver, the standard heated steering wheel and heated power-fold door mirrors offer essential winter utility. Whether navigating the urban jungle or a mountain trail, the Defender 110 S delivers the iconic "unstoppable" feel that has made this nameplate a global legend.
